

## STELLAR INFLIGHT OPENS VIDEO DUBBING AND EXPANDS VIDEO EDITING AND ENCODING FACILITIES IN KUALA LUMPUR

Kuala Lumpur, 06 APRIL 2009 – Stellar Inflight is pleased to announce the opening of a video dubbing facility in Kuala Lumpur as well as an additional video editing and encoding suite.

Identifying a requirement to service the company's customers with ongoing support for Hi-8 and VHS video tape technology, the facility will service regular dubbing requirements and is also available for any other requirement for video tape duplication for the IFE industry.

Featuring multiple NTSC and PAL master tape machines, the new suite also offers standards conversion for regional content native in PAL to the IFE ready NTSC standard.

An additional editing and encoding suite has also opened, offering encoding of content for digital platforms in several formats, including the common airline formats of MPEG-1, 2 and 4.

Stellar KL General Manager Peter Capel said: 'Our expanded services in KL will allow us to service our customers in a more timely and efficient manner as well as offering airlines within the region access to IFE technical services never before offered in South East Asia. In addition to the the video dubbing facility, our connection to Smartjog allows digital content encoded in KL fast delivery to content integrators.'

A tour of the expanded Stellar KL facility is scheduled for Thursday 30 April 2009, as part of the program for WAEA Week in Kuala Lumpur and the company looks forward to welcoming all interested delegates.
